28		<u>T</u>					-
29		<u>1.10</u>					<u>VPZ=0.98"; NL=1.20"</u>
30		<u>.04</u>					<u>VPZ=.05"; NL=.05"</u>
31		<u>.13</u>					<u>VPZ=.14"; NL=.16"</u>

* Snowfall from snowboard or from average of several representative sites if snow is drifted and uneven. Snowfall is defined as the maximum accumulation of new snow since the previous observation -- prior to melting or settling.

** Total Depth of snow and ice at observation. Snowdepth is the representative average depth of all new and old snow and ice on the ground.

*** Water content of representative core sample of total snow and ice on ground.
